

# WATERED OFFICE PLANTS CLARIFIED PATENT'S STATUS STOPPED GLOBAL WARMING

**THE BEST CAREER. EVER.**

## **PROCESS TECHNOLOGIST (M/F) TECHNICAL SUPPLIER MANAGEMENT MODULES**

**Job number Q-P-793**

**Location: Bitterfeld-Wolfen**

Come and work for the **Technology Division** at Q-Cells – and join us as we evolve into the leading provider of photovoltaic solutions! Since Q-Cells was founded in 1999, we've been driving the market for solar power applications – and with currently around 2,500 employees and turnover of €1.35 billion, we've become one of the world's foremost photovoltaic companies. Our product portfolio ranges from ultra-efficient solar cells as well as crystalline and thin-film solar modules to complete solar power stations.

**Responsibilities:** provide technological support for module manufacturers with international operations, with a focus on Germany and Europe / act as internal point of contact for the areas of procurement, quality and supply chain management modules for technical questions relating to module manufacturers / create regular reports on current and strategic assessment / plan, coordinate and implement common improvement measures relating to yield and costs with the module manufacturers and analyse their potential

**Qualifications:** successfully completed studies in the fields of science or engineering / initial professional experience in developing and maintaining relationships with customers or suppliers, ideally in the photovoltaics field / knowledge of working with KPIs based on statistical production data / ability to abstract, negotiating skills and a capacity to deal with conflict and be assertive / systematic and analytical approach, a focus on implementation, conscientiousness and organisational talent / good MS Office skills, in particular in Excel and PowerPoint / business-fluent spoken and written German skills and very good spoken and written English skills / a willingness to travel

We need your energy and your expertise in order to set new benchmarks in photovoltaics. Benefit from attractive professional development prospects and broad career scope in an international corporation!
