

WATERED OFFICE PLANTS CLARIFIED PATENT'S STATUS STOPPED GLOBAL WARMING

THE BEST CAREER. EVER.

HEAD OF TECHNOLOGY SCREENING (M/F)

Job number Q-P-798

Location: Bitterfeld-Wolfen

Come and work for the **Technology Division** at Q-Cells – and join us as we evolve into the leading provider of photovoltaic solutions! Since Q-Cells was founded in 1999, we've been driving the market for solar power applications – and with currently around 2,500 employees and turnover of €1.35 billion, we've become one of the world's foremost photovoltaic companies. Our product portfolio ranges from ultra-efficient solar cells as well as crystalline and thin-film solar modules to complete solar power stations.

Responsibilities: responsibility for the technology intelligence activities within the field of technology / conception and implementation of strategy processes within the field of technology / direct and functional leadership and development of a technology screening team within the field of technology / proactive formation of the technology roadmap, forming a central interface between research and product development and other corporate areas, in particular product management / evaluation of development projects from a technical and economic viewpoint and preparation of decision-making documents for department management and the board of management / key contribution to the development of the company into a leading solutions supplier in the photovoltaic market

Qualifications: successfully completed studies in the fields of science, industrial engineering or business engineering; PhD desired / many years of professional experience of research and development projects in an industrial environment / management experience required / experience in team and project leadership in the field of research and development as well as product development / experience in the evaluation of technology and the design of strategic processes in technology-oriented companies / additional business management knowledge / systematic, analytical and entrepreneurial approach, decision-making expertise and team skills / ability to prioritise, authenticity and the ability to motivate and drive employees / excellent MS Office skills, in particular in Excel and PowerPoint / business-fluent spoken and written German skills and excellent spoken and written English skills

We need your energy and your expertise in order to set new benchmarks in photovoltaics. Benefit from attractive professional development prospects and broad career scope in an international corporation!
